

FAASTeam presents:

Conducting an Appropriate Flight Review- Preparation through Endorsement

This CFI/ DPE forum is intended to be an interactive discussion of the flight review process aimed at fulfilling the promise and expectation of the review. Included in the presentation and discussion will be resources available to assist the CFI and the candidate, and standards to be applied during the ground and flight segments. Discussion will also include the role of the WINGS program, establishing a relationship with aviators, setting the occasion for the aviator to seek and obtain additional training (advanced ratings and/or certificates), integrating simulators with ground training and flights, and scheduling regular proficiency flights with a CFI. The meeting will conclude with an orientation tour of Eastland Career Center's new high-school-level, STEM-designed simulator lab where participants will have an opportunity to engage with a RedBird TD-2 or a Gleim BATD.

Directions: After arriving at 4465 S. Hamilton Road, turn onto Directors Drive at the light. Proceed to the back of the main parking lot and straight ahead you will see the new Engineering Technologies Building. You may park in the lot at the right side of the building. You will see the hangar doors at the North side of the building which opens to the Aviation Lab and classroom. See attached Map.
